FUTURE ACTION ITEM #1
WSU Pullman, Global Animal Health Phase 2, Design Approval
(Stacy Pearson/Olivia Yang)

TO ALL MEMBERS OF THE BOARD OF REGENTS

SUBJECT: WSU Pullman, Global Animal Health Phase 2, Design Approval

PROPOSED: That the Board of Regents approve the WSU Pullman, Global Animal Health Phase 2, Design Approval.

SUBMITTED BY: Stacy Pearson, Vice President for Finance and Administration

BACKGROUND INFORMATION: The Global Animal Health Facility Phase 2 will be the new home of the Paul G. Allen School for Global Animal Health disease detection and surveillance program. This program, which is integral to the mission of the Allen School, is delivered primarily through the Washington Animal Disease Diagnostic Laboratory (WADDL). WADDL is at the front line of the nation’s defense against foreign diseases, zoonotic diseases, and food-borne illness, and is known regionally and nationally for its work to combat pandemic flu, avian influenza, West Nile Virus, Mad Cow Disease and Foot and Mouth Disease. The facility will also house research and development laboratories and serve as a teaching laboratory for educating veterinary (DVM) students, post-DVM and other health professionals, graduate, and undergraduate students. This facility will be physically connected to the Phase I Global Animal Health building (Allen Center) that houses the Allen School global animal health research programs.

The proposed location of this new building is consistent with the WSU-Pullman Master Plan and would contribute to the development of the College of the Veterinary Medicine area Master Plan.
